

Vascular Surgery

Open Surgery Observation (replacing DOPS)

Trainee to complete

Trainee:	Supervisor/Trainer:
SET Level:	Hospital:
Procedure Technique:	
Description of case:	
It would be helpful to have specific feedback on ...	

<p>OVERALL RATING* Supervisor/Trainer observes the trainee performing the procedure and indicates which describes the competence of the trainee in the scenario observed.</p>			
<input type="checkbox"/> I had to talk them through Able to perform tasks but requires constant direction	<input type="checkbox"/> I needed to prompt Demonstrates some independence, but requires intermittent direction	<input type="checkbox"/> I needed to be there just in case Mostly independent, but still requires supervision for safe practice	<input type="checkbox"/> I didn't need to be there Understands risks and performs safely, ready for independent practice

Supervisor/Trainer uses the prompts below to provide comments on the trainee's performance in **at least 3 areas**.

<p>Preoperative Preparation Obtains/confirms informed consent from the patient; prepares for procedure according to agreed protocol, including checking patient's record and ensuring equipment is available; participates in timeout; correctly prepares and positions patient.</p>
<p>Procedural Steps and Anatomy Demonstrates familiarity with the sequence of the procedure and anatomical exposure and the structures encountered; targets the approach appropriately.</p>

* Scale adapted from Gofton (2012).

Manual Dexterity and Flow

Demonstrates safe effective and efficient use of instruments; safe and effective tissue handling; efficient anastomotic technique, endarterectomy technique, etc; demonstrates economy of movement and efficient procedure flow; pre-empts requirements for equipment.

Situational Awareness and Adaptability

Anticipates complications and takes appropriate precautions to minimise harm; adapts procedure to patient specific anatomy and pathology; responds to unexpected circumstances.

Communication, Professionalism and Leadership

Respectful and effective communication with staff; seeks assistance when appropriate; remains calm and in control in high pressure situations.

Postoperative

Provides instructions for postoperative care; documents details of the procedure.

Complexity of case: Easy Average Difficult

General Comments on what was done well or what could be improved (Supervisor/Trainer to complete)

Actions for improvement (Trainee to complete)

Trainee should repeat this activity on another similar case.
